JD Edwards Enterprise One

Choosing CDI Technology's e-commerce enabled with XML interoperability means that the quality of your E1 ERP shines through. ERP2Web calls JDE Business Functions in real-time.

This transforms the way you do business, leaving behind manual processes in favor of a well-designed experience for sales, customer service reps and customers.

JD Edwards World

When business logic is required in World, we access JD Edwards functions and data using CDI's virtual terminal server for screen by screen navigation.

Real-time Calls to JD Edwards Create an

Exceptional Online Customer Experience

Bonding Customers to Companies in B2B.

EXCEPTIONAL ONLINE CUSTOMER EXPERIENCE

JD Edwards >> ERP2Web

Customers easily discover your products via rich, multi-media marketing content in online catalogs that can be customized by user profile.

The order experience is optimized for B2B with quick order options like excel uploads, saved templates.

Immediate, accurate delivery of critical information like item availability and advanced pricing allows customers to act now.

Master file information can be batch processed and smart cached to enhance overall system performance.

SELF SERVICE: FRICTION-FREE B2B

B2B Buyers Expect B2C Efficiency and Control.

Meeting Demands For Self Service

Creates Revenue Boosting Results.

Delivering customer self-service is no longer an option, it is an expectation. Promote stability, confidence and excellence, all while bringing new and increased revenue online.

Customers can serve themselves important updates such as order status with shipment tracking, invoice and account inquiries.

Accelerate cash collection by accepting credit card and ACH payments online. Process real-time integrated, secure payments with PCI PA-DSS Validated SnapPay.

Put the administrative control of e-commerce in the best place possible. ERP2Web can be easily configured by non-technical staff.

All configuration is controlled by settings, and multiple themes are available for administrators to choose from.

User security can be tied to JD Edwards address book records. Administration and sub-administration for customers allows customers to manage their own users.

A pair of dark-colored binoculars is centered in the upper half of the image, set against a blurred background of a landscape. The binoculars are the primary visual element in the top section.
