

INTEGRATED PAYMENTS

FOR SAP

Streamlined, Secure SnapPay for SAP Payments

Driving the cash collection process with SnapPay enables payment of orders within SAP and customer self-service for payment of open AR in a convenient, real-time portal.

Real-time Integrated SAP Payments

Improve payment processes and collect cash faster with CDI's payment solution.

Accept credit card payments for sales orders, leveraging the value of SAP in real-time.

Accept credit cards or ACH for payments of open AR via the SnapPay customer payment portal.

Interchange optimization with Level 2 and Level 3 card data support for significant cost savings.

CDI uniquely offers a complete solution including the payment application, gateway and processing.

Simplify PCI Compliance and Reduce Risk

Keep credit card data where it belongs, tokenized and completely away from your ERP. No card data is stored on your system.

Rely on CDI's PCI PA-DSS Validated solution for managing security risks including hosted payment forms.

Accept CSR credit card by phone orders with a secure encrypted keypad.

Credit Card Payment For Sales Orders

SnapPay integrates secure credit card processing with your SAP sales order entry process and updates payment information in SAP.

Streamlining critical payment functions enables your business to move through payment, shipping and cash collection with ease and confidence.

SnapPay provides clear information about authorization, settlement and reporting on payment transactions.

Portal For Open Accounts Receivable

With SnapPay, your portal for Open AR allows you and your customers to view, pay, and download open invoices and payment history.

Customer portal self-service allows users to make future and recurring payments, including on-account payments.

Securely allow customers to update payment methods via hosted payment forms.

Real-Time SAP Integration

Key Integration Points:

- Credit Card Orders
- On Account Payments
- Invoice Payments
- Scheduled Payments
- Open Invoice Inquiry
- Tokenized Cards / Bank Account On File
- Customer Master

SAP BAPI Level Integration

Choosing CDI Technology's SnapPay integrated payment solution means that the value of SAP is extended to create the greatest possible impact.

SnapPay calls published and custom BAPIs in SAP in Real Time.

PCI-Friendly Security

Hosted payment forms secure credit card payments for sales orders.

Tokenization is included, and tokens are integrated with SAP sales orders.

No credit card data ever resides on your systems or within SAP.

CDI offers a SRED encrypted keypad for CSR sales order credit card payments by phone.

PCI PA-DSS Validated Solution.

Order To Cash Coverage

Single vendor solution for payment application, gateway and processing for the complete order-to-cash process.

Built-in integration with BluePay Gateway and Processing and excellent rates.

Directly integrated and automatic Level 2 and Level 3 card data support for cost savings.

Direct-to-bank ACH for faster deposit of funds.

Powerful Administration

Easy administration and configuration.

Capability to add logos and look and feel to match your branding.

Replaces manual reconciliation processes.

Customer onboarding portal for managing new user workflow offers self-service for new user registration.

User security integrated directly with SAP and tied to customer records.
